Ref A,B,D, for lining process  
Ref for machining pipe flange

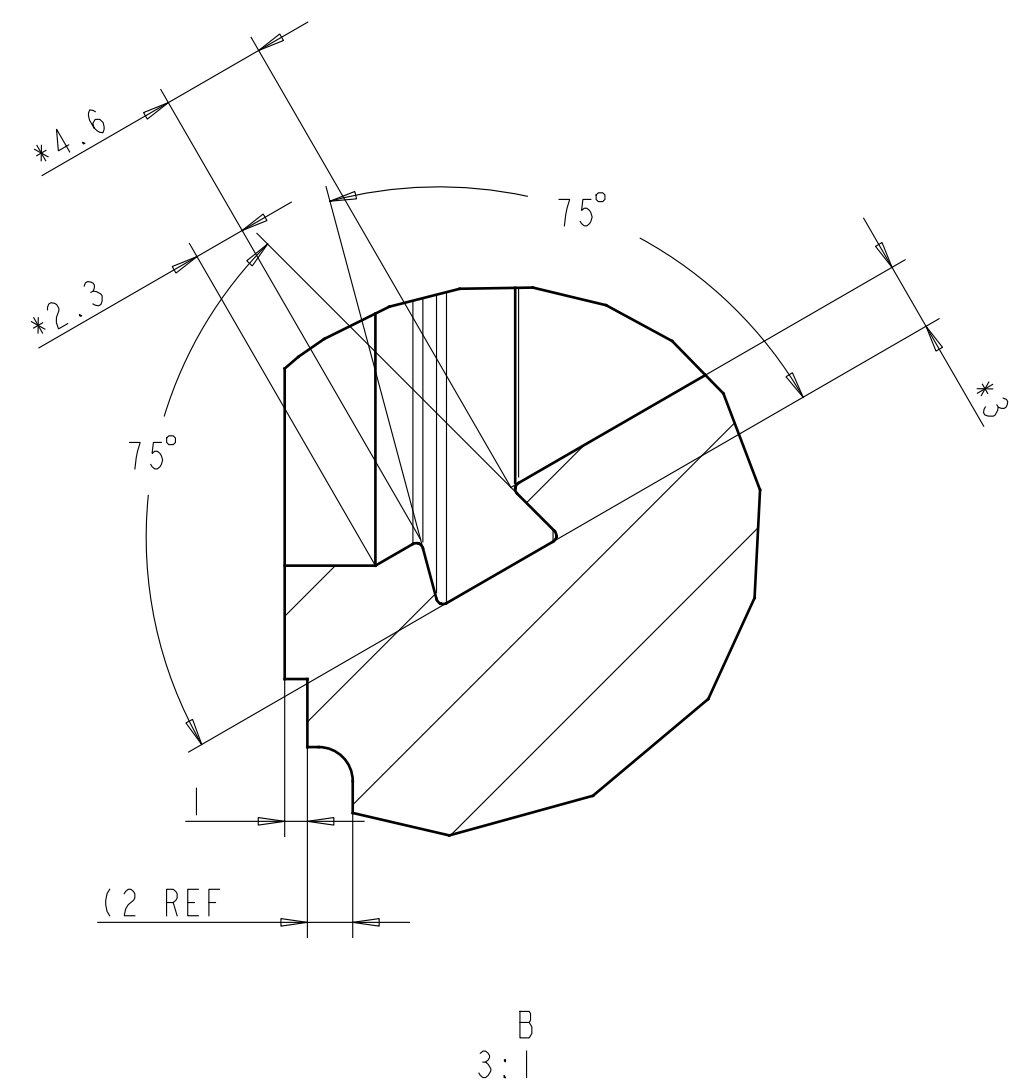

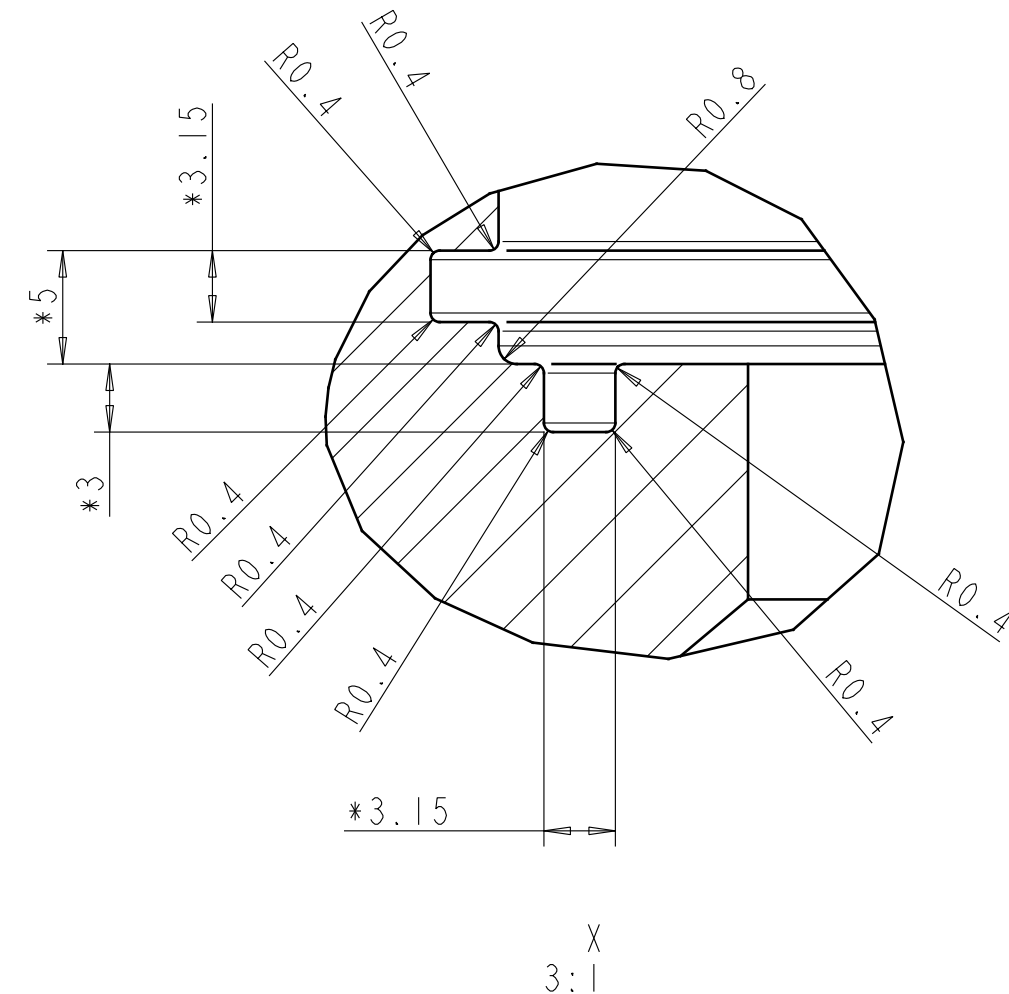

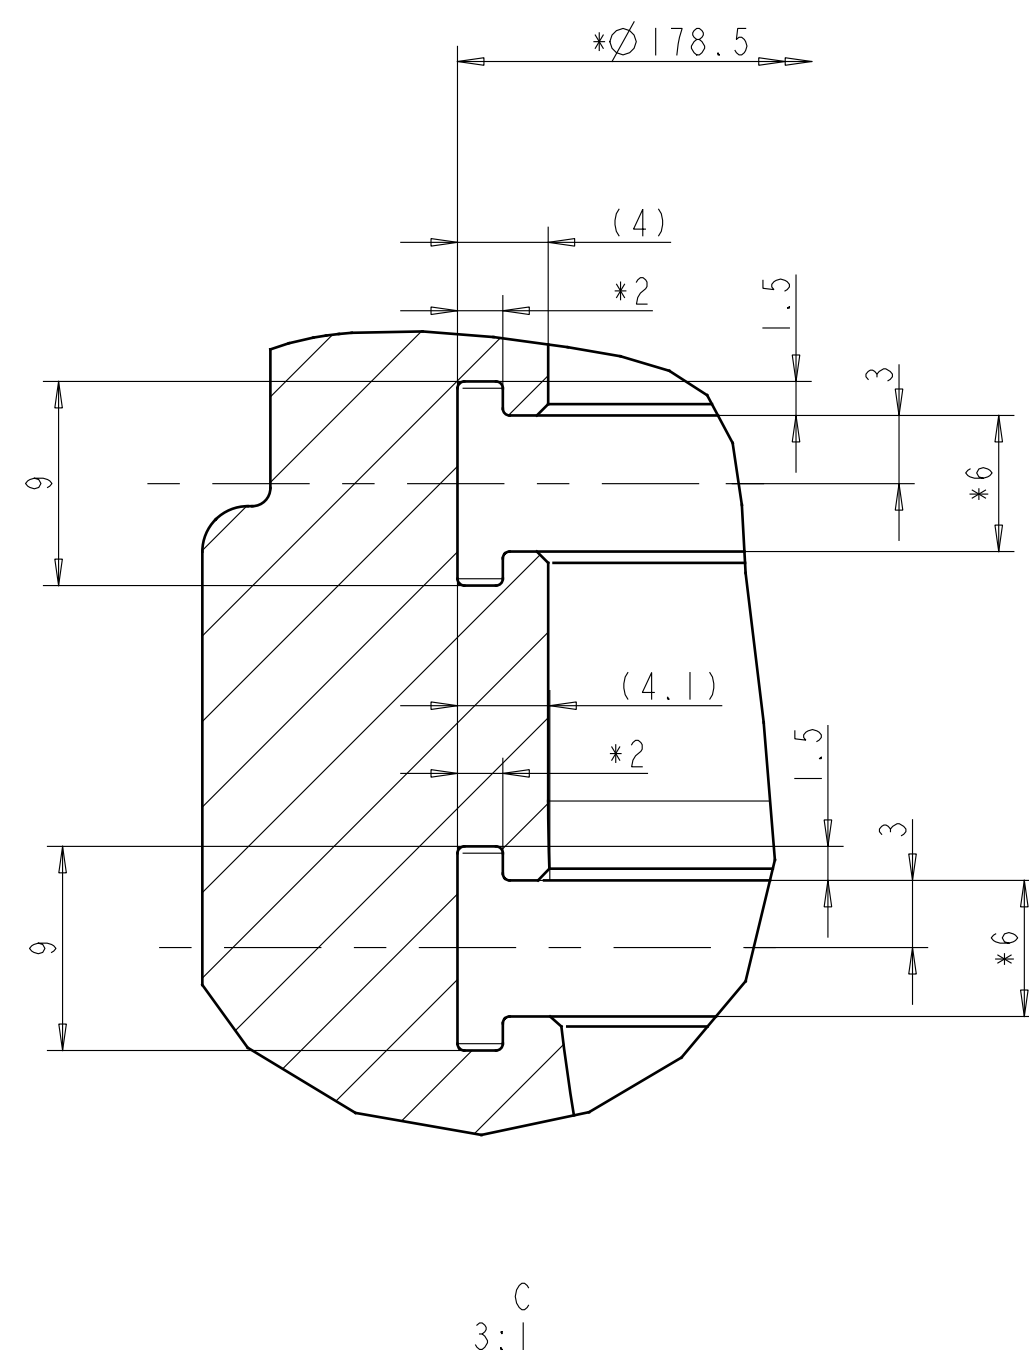

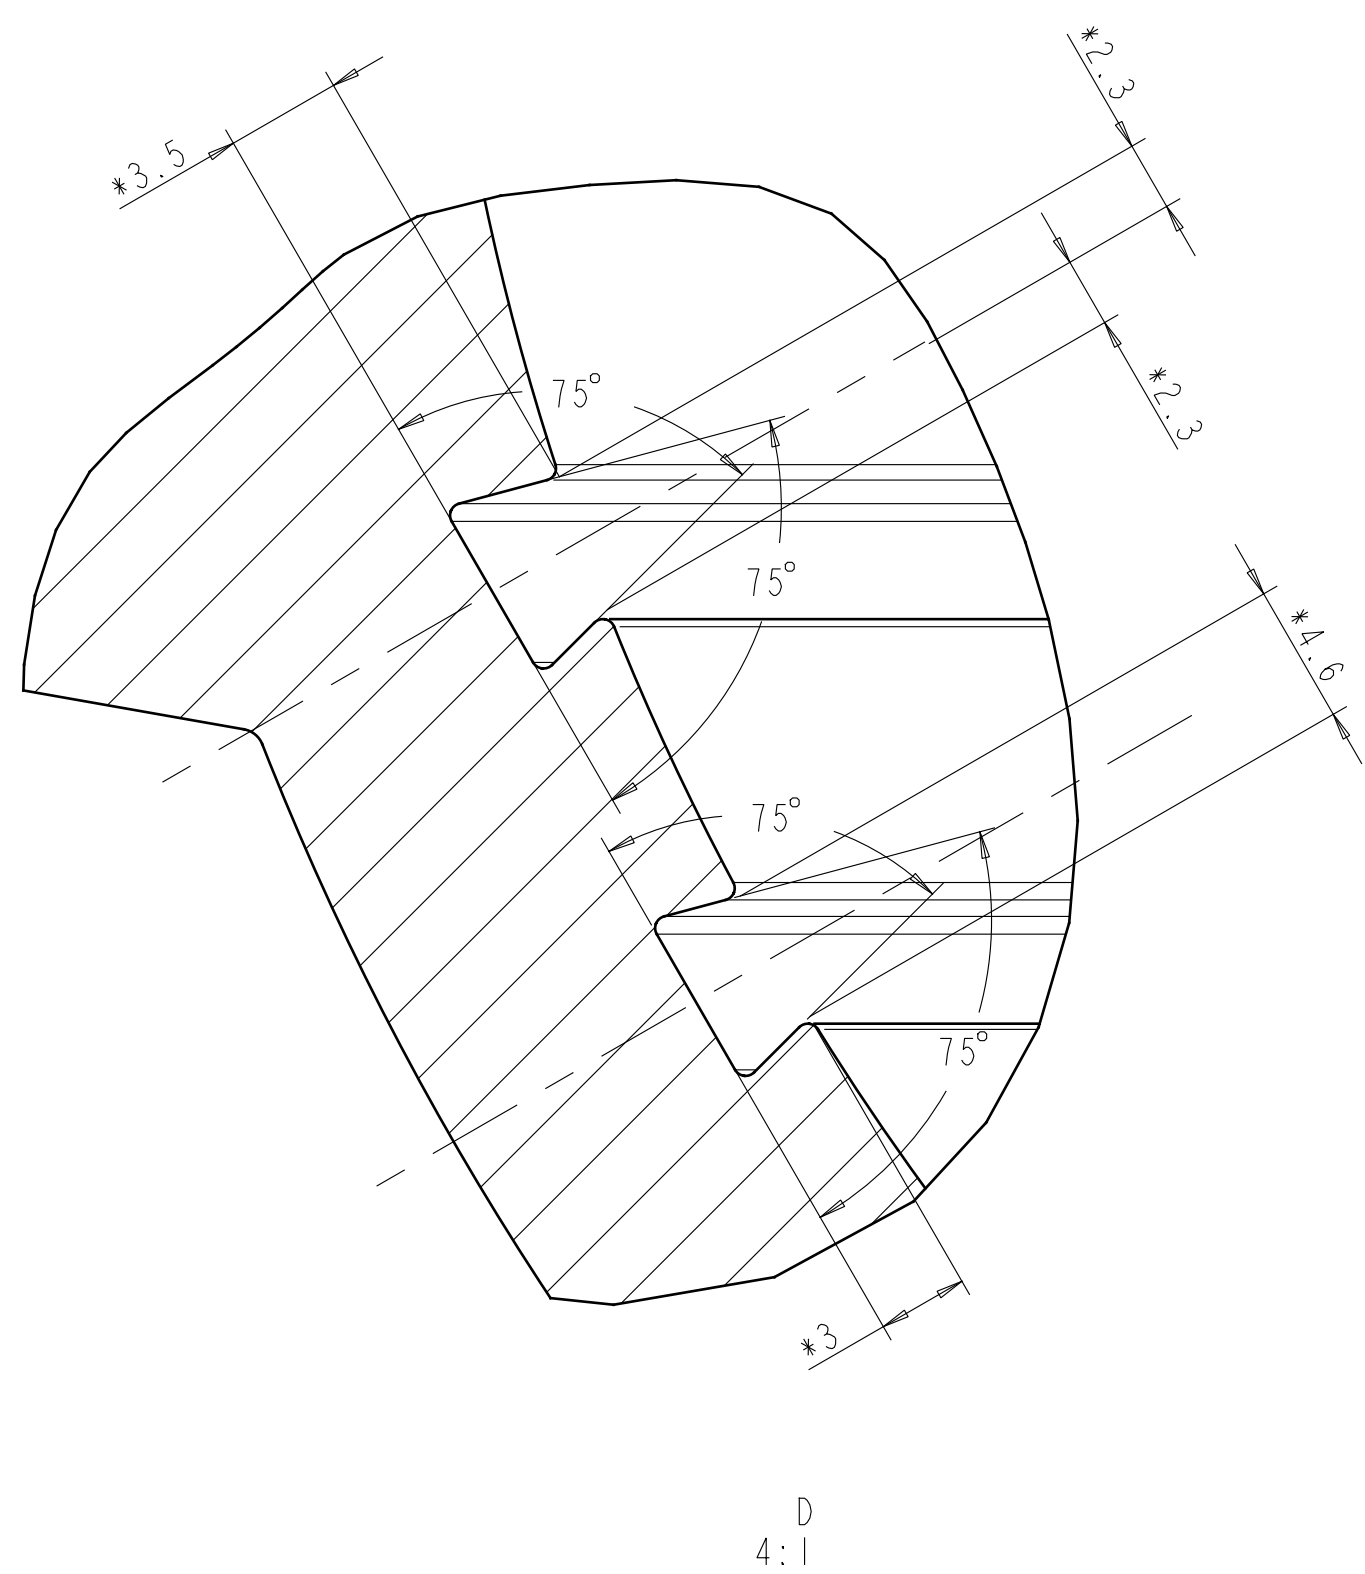

All sharp edges to be deburred

All machined surfaces:  $6.3 \sqrt{\text{mm}}$

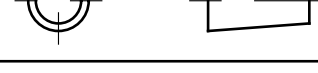

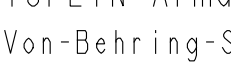

Specification ref 

\* marked dimensions tolerance according to DIN ISO 2768 part 1c+2K

\*\* marked dimensions only for  
machining reference do not consider  
while inspection.

Density =  $7.15 \text{ kg/dm}^3$   
Mass =  $15.95 \text{ Kg}$

|                                                                                                        |  |                                                                                                                                                                                                                                                  |  |     |    |    |
